

## Internal Medicine Residency Spokane Program

### Medical Knowledge Readings Intern/Senior – ICU – SHMC/Deaconess

#### Medical Knowledge:

The intern and senior resident are expected to learn the general approach to the evaluation and treatment of patients within the context of multiple diseases. There are multiple resources for furthering your education including textbooks, UpToDate/DynaMed, articles, and bedside learning. Below we have provided links to core areas of knowledge that we believe will be essential to your months in training.

The topics will be re-evaluated throughout the year during resident only meetings and we appreciate suggestions of relevant topics/documents or irrelevant documents that may have an alternative superior option.
